Uniting Stakeholders to build a regional hydrogen economy in the North Sea Region

- Platform-marketplace
- Data mining
- Managing production
- System integration
- Incentives promotion
- Roadmaps
- Pilots

Follow LIHYP

## Launching the NSR H2 Platform

Establishing the NSR Hydrogen Triple Helix Platform – a dynamic marketplace for 2,000 associates that serves as a hub for contact, information sharing, and collaborative planning for hydrogen applications.

## H2 Demonstrators

The main objective is on H2 Demonstrators to showcase and develop solutions, demonstrating the feasibility and acceleration of hydrogen use.

## Regulations for Green H2 Integration

The goal is to identify and address regulatory barriers hindering the implementation of a cross-border clean hydrogen economy, fostering awareness and harmonization.

## Realizing interregional H2 roadmaps

Creating a Hydrogen roadmap for the North Sea Region (NSR) until 2030 by drawing insights from bottom-up platform data and LIHYP pilot regions, serving to elevate awareness and decision support of Fit-for-55 targets.
