Supporting municipalities and ports to protect nature by implementing new light-reduction solutions

The Interreg North Sea Project DARKER SKY aims at reducing light pollution and **increasing biodiversity and ecological connectivity** in the North Sea Region (France, Germany, the Netherlands & Denmark).

We are providing municipalities and ports with innovative **measuring, monitoring and co-design methods** for the implementation of environmentally sound and energy-efficient light reduction **benefitting biodiversity and communities.**

13 partners
from 4 North Sea
region countries

April 2023
October 2026

Co-financed by the European
Regional Development Fund
(Interreg North Sea Programme)
with € 2.529.972
