'Reporting and Changes –
An interactive Journey of Insights, Discussions and Experiences'

Build-Up Workshop
Billund October 2024

Malena Ripken & Antonia Krebs

1

2

Rules of the Game

Step 1   Stand up and stay in the middle of the u-shaped categories.

Step 2   Have a look at the 5 statements Reporting and Changes. Think about how strongly you disagree or agree with them.

Step 3   Allocate ONE of the five statements to each category, from strongly disagree (-2) to neutral (0) to strongly agree (+2). Indicate this on the questionnaire. ***NOTE:** Only one statement per category is possible*

Step 4   Each statement will be considered in turn. The different rankings are set out around the room. The facilitators will guide you through the process.

Step 5   Explain and discuss your decision with the entire group

Step 6   Repeat from step 4 until all statements are considered or until we run out of time!

Step 7   After discussing all statements you will be able to change your initial ranking

> **Goal of the session:** Have fun! Talk to your 'neighbours', and actively discuss

2

Overview of Statements

! Only one statement per category is possible !

- 2	- 1	0	+ 1	+ 2

#1: The OMS is a great intuitive tool and helpful for project management

#2: Interreg projects are too bureaucratic and more about project management and reporting than actual content

#3: Generally, reporting is on time and all partners submit their reports within the deadlines and without any controller and AS problems

#4: Projects need more flexibility when it comes to deadlines, project changes and management

#5: The Interreg JS is very helpful regarding reporting and related questions and gives quick feedback and support
