

ShareDiMobiHub (Shared and Digital Mobility Hubs) is an Interreg North Sea Region project and it aims to increase urban accessibility and liveability for its citizens and visitors by introducing shared mobility hubs at a city or metropolitan or regional scale in the North Sea Region area. The project supports public authorities such as cities and regional governments to implement similar solutions.

On behalf of the whole project team: enjoy reading this newsletter and feel free to reach out to us in case you would like to have more information.

Project-related news

In this section you will read about a series interesting news item related to our project.

Why do European city governments need innovation capacity?

This report looks at how European city governments are approaching innovation and what help they need to build their innovation capacity. The picture that emerges is inevitably a mixed one.

Some cities are finding it easier to build up their innovation capacity than others, and some capabilities are proving easier to develop than others

[Read the report here](#)

What about shared mobility for housing?

New housing developments provide a unique opportunity to start building sustainable ways of moving. The [Interreg North-Sea project Share North Squared](#) has produced a series of brochures focusing on engaging housing associations and urban developers on how to include shared mobility.

[Access the brochures here](#)

Are cars getting bigger? Yes, Brussels finds out.

A new joint study conducted in the Brussels-Capital Region (RBC) by the public service agencies Bruxelles Mobilité and Bruxelles Environnement has highlighted a worrying increase in car volume and weight.

The freshly-released study highlights six categories of impacts: Zero road deaths and severe injuries, active travel space, just transition, air quality, climate and energy efficiency improvements and environmental and social externalities.
